microSD Cards

microSDXC 340S

Aiming for mobile devices and handheld game consoles, Transcend's Ultra Performance microSDXC 340S memory cards compliant with the latest A2 speed class boast excellent random read/write speed for retrieving small pieces of data from random locations, and speeding app launch time.

A good fit for mobile storage

Mobile games and handheld game consoles are getting more popular. Both applications require great random read/write performance and storage expansion. Compliant with the latest A2 specification, Transcend's microSDXC 340S memory cards are the right fit for mobile apps and handheld game consoles.

Introducing Application Performance Class

The Application Performance Class was introduced to fulfill the growing need for a better combination of random and sequential performance on mobile devices. Transcend's microSDXC 340S memory cards meet the new A2 standards, delivering minimum random read of 4,000 IOPS and random write of 2,000 IOPS, and sustained sequential speeds of at least 10MB/s.

Note: Please make sure your device supports SD 6.0 specification or later to reach the optimal A2 performance.
Show the transfer capabilities

Transcend's microSDXC 340S memory cards meet both the UHS Speed Class 3 (U3) and the UHS Video Speed Class 30 (V30) standards. By leveraging UHS-I technology, it delivers superior read/write speeds of up to 160MB/s and 125MB/s respectively, ideal for 4K Ultra HD video recordings and seamless gaming experience!

Note: 1.Speeds based on internal testing. Advanced technology implemented to reach R/W speeds beyond UHS-I 140 MB/s.
2.Full performance achieved only when paired with Transcend HUB5C card reader with the latest firmware update.
