312358	7330985125386	1/6/48	Box

* RP = Retail packaging, IP = Inner packaging, OP = Outer packaging

Remote controlled outlets have been around for many years now. And they have always been bulky and, to be honest, quite boring design. We think it is time for a change. So we are thrilled to introduce the new and slim plugs!

They are not only stylish, but also capable of handling larger loads than before. You can now control much more than just lamps since they are certified for loads up to 3680W/16A. So feel free to use them everywhere inside the Smart Home.

These beautifully designed outlets deserves a nice packaging so we put a lot effort in designing a high-end packaging. It is also environmental friendly since it is made out of 100% recyclable paper.

The outlets have five memory slots, FiFo memory handling and other nifty features. And they are of course compatible with Telldus Live.

In stock now for instant delivery.
